

XH-W1401 Intelligent Digital Thermostat Module

Temperature Control

Description:

- Imported high-speed microcontroller, precise Intelligent Control
- Three window display at a glance
- Setting is simple, easy to operate
- Wide Range -9 ~ 99 °C arbitrarily set
- Space for a variety of temperature control, temperature control, incubators, etc.

Feature:

- Temperature range: -9-99 °C
- Accuracy: 1 °C
- Control accuracy: 1 °C
- Setting Range: -9-99 °C
- Refresh rate: 0.5S
- Input Power: DC12V
- Output: relay output, 10A
- Environmental requirements: -10-60 centigrade
- Humidity: 20% -85%
- Temperature sensor: NTC(3950-10k 1%)
- Size: 78mm (length) x 50mm (width)
- Power consumption: quiescent current $\leq 40\text{MA}$, pull current: $\leq 65\text{MA}$
